TECH STACK

Category	Technologies
Core Frontend	React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3
Styling & Animation	Tailwind CSS, GSAP, Framer Motion, CSS Animations
Data Visualization	Recharts, D3.js, Chart.js, ClickHouse (analytical queries)
State & APIs	Redux, Context API, REST APIs, WebSockets, Apache Kafka
Backend & Data	Node.js, Express, Python, PySpark, PostgreSQL, MongoDB
Tools & Deployment	Git, Docker, Vercel, Supabase, Firebase, Figma

PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer with **2+ years** of experience crafting **high-performance, visually polished web applications** with a focus on **data visualization, interactive UI, and seamless user experiences**. Career-changer from public health, now building production dashboards, editorial platforms, and immersive animated interfaces for clients across **media, education, logistics, and publishing**. Former **Visualization/Frontend Engineer at Thraets**, where I translated complex datasets into compelling visual narratives. Currently a **part-time facilitator at Refactory Academy**, mentoring the next cohort of junior developers. Adept at building **responsive, accessible, component-driven architectures** using React, Next.js, and modern animation libraries. Passionate about pixel-perfect execution and delivering interfaces that users trust.

EXPERIENCE

Part-Time Visualization / Frontend Engineer — *Thraets (Publication)* 2024 – Present

- Served as the lead frontend engineer for **Thraets**, a digital publication focused on data-driven

storytelling and visual journalism.

- Designed and developed **interactive data visualizations** that transformed complex editorial datasets into engaging, reader-friendly visual narratives using **React, D3.js, and Recharts**.
- Built **responsive, performance-optimised article layouts** and landing pages with **smooth scroll-based animations** and micro-interactions using **GSAP and Framer Motion**.
- Collaborated directly with editors and data analysts to translate raw data into **intuitive charts, maps, and infographics** — increasing average reader engagement time by **40%**.
- Implemented **ClickHouse-powered dashboards** for internal editorial analytics, enabling the team to track content performance in **near-real-time**.
- Ensured **cross-browser compatibility, WCAG accessibility compliance, and sub-2-second load times** across all published pages.

Freelance Frontend Developer

2024 – Present (2 years)

- Designed and developed **12+ responsive, production-grade web applications** for clients in education, e-commerce, and logistics.
- Leading frontend development of an **enterprise Learning Management System (LMS)** for **TASC Corporation** — featuring course enrollment flows, video streaming UI, progress dashboards, quiz interfaces, and a comprehensive admin panel (**React.js 19 + Tailwind CSS + PostgreSQL**).
- Engineered a **real-time inventory tracking dashboard** for a Kampala-based logistics company using **React, Recharts, and WebSockets** — reducing stock discrepancies by **70%** and enabling managers to monitor operations at a glance.
- Built **data ingestion and transformation workflows** using **PySpark and Apache Kafka** to feed live analytical dashboards with high-volume transactional data.
- Maintained **100% client satisfaction** with consistent on-time delivery and multiple repeat engagements.

Part-Time Software Development Facilitator — *Refractory Academy, Kampala*

2026 – Present

- Teach fresh developers core software engineering fundamentals including HTML, CSS and basic computing.
- Guide students through hands-on projects, code reviews, and debugging sessions to build practical, job-ready skills.
- Mentor learners on industry best practices, problem-solving approaches, and the mindset shifts required to transition into professional development work.
- Contribute to curriculum feedback and learner assessment alongside the core Refractory teaching team.

EDUCATION

Certificate in Software Engineering

Refactory Academy, Kampala — 2025

Master's in Public Health

Southern Medical University, Guangzhou, China — 2023

SELECTED PROJECTS

GTA IV — Cinematic Clone Website

Live

Visually immersive, cinematic site with GSAP transitions, parallax, and motion design.

React

GSAP

Tailwind CSS

Vite

gtavimay.netlify.app 

Thraets — Data Visualization Platform

Live

Interactive editorial data viz: charts, filters, animated transitions, responsive article layouts.

React

D3.js

Recharts

ClickHouse

Tailwind CSS

muhoozibobicharts2.netlify.app 

TASC LMS

In Development

Enterprise LMS: RBAC, progress analytics, video, quizzes, admin — multi-tenant UI.

React.js 19

Django

PostgreSQL

Tailwind CSS

Cloudinary

www.tasclms.com 

SwiftLogistics Dashboard

Live

Real-time inventory & analytics; live feeds and operational reporting.

React

Node.js

Recharts

WebSockets

Kafka

swiftlogisticslive.netlify.app 

KEY COMPETENCIES

- ✓ Data visualization & dashboard development
- ✓ GSAP / Framer Motion animation & micro-interactions
- ✓ Responsive, accessible, cross-browser UI
- ✓ Component-driven architecture (React, Next.js)
- ✓ Real-time data rendering (WebSockets, Kafka)
- ✓ Analytical dashboards (ClickHouse, Recharts, D3.js)
- ✓ Performance optimisation & Core Web Vitals
- ✓ Agile collaboration with designers & data teams
- ✓ Secure frontend patterns (auth flows, input sanitisation)
- ✓ Pixel-perfect implementation from Figma/design specs
- ✓ Mentoring & technical teaching (junior dev coaching, code review)
- ✓

PRIOR CAREER — PUBLIC HEALTH & COMMUNITY PROGRAMS

2016 – 2024 · Uganda — Master's in Public Health (Southern Medical University, Guangzhou, China, 2023). Eight years leading community health programs across Uganda with Living Goods, Healthy Entrepreneurs, and St Lawrence Medical Center — including training Village Health Teams, designing capacity-building curricula, managing HMIS data reporting, and stakeholder engagement with District Health Teams across four districts. This background sharpens my work on data dashboards, health-tech interfaces, and tools built for non-technical end users.
